DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species A: Figures 1a, 1b, 4a, 4b, 13a, 13b

Species B: Figures 2a, 2b

Species C: Figures 3a, 3b

Species D: Figure 5

Species E: Figures 6a-c

Species F: Figures 8a, 8b, 9a, 9b, 14a-d

Species G: Figures 10a, 10b

ALL: Figures 11a-d, 12a-d, 15a-f, 16a-f, 17a-d, 18a-d

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 3781

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species A: 73, 99

Species B: 68, 73

Species C: 68, 73, 99

Species D: 73

Species E: 76-80 and 96

Species F: 76-79

Species G: 76-79 and 99

ALL: Claims 56-67, 69-72, 74, 75, 81-95, 97, 98 and 100-110

No claims are considered generic.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

4. There is not a special technical feature common to all the groups that make a contribution over the prior art. A sealing means is known in the art, as can be seen in the example found in Luch et al. (U.S. Patent No. 5,415,306) with sealing means 78 (Figure 4).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
